

Your data on your terms.

HST Data Stream allows ASC management groups to access raw data in real-time and connect that data to business intelligence tools. By doing so, key stakeholders can simply analyze critical benchmarks for all the surgery centers within their portfolio, make informed, data-driven decisions, and improve profitability.

Without a way to retrieve and view your data in one centralized place:

- **Making important decisions** can feel like guesswork.
- **Being able to predict growth** becomes next to impossible.
- **Productivity** will continue to stall.
- **You won't truly know the areas** of your surgery centers that require more attention.

If you want more unified and clearer data, you need HST Data Stream.

QUICK UPDATES

Make real-time changes to your own data elements.

MERGE YOUR DATA

Bring all your data together in one central location.

INSTANT DATA CAPTURE

Combine and search large data sets in a flash.

HIPAA COMPLIANT

With powerful security measures in place, we confidently protect patient data.

EFFORTLESS BI CONNECTION

Connect your raw data with your trusted business intelligence tools to clearly visualize data through robust dashboards and reports.

Schedule a demo by scanning the QR code to the right to see how HST Data Stream can help grow your practice.

With **HST Data Stream** you can:

- **Boost profitability** and trim wasteful spending with visibility into the key factors impacting your revenue.
- **Reduce inefficient operations** by easily analyzing daily operational reporting so you can remove disorganized processes.
- **Meet regulatory requirements** and maintain compliance by having exportable, actionable data at your fingertips.
- **Deliver better patient care** and spend less time trying to understand your surgery center's data and more time supporting patients.
- **Gain complete insight into** your facilities' operational, financial, and clinical health.
